

Treatments

Exceptional treatment, tailored to your specific needs. That's our approach to supporting you on your fertility journey.

Our renowned fertility specialists are your dedicated partners in helping you achieve a healthy pregnancy. Our treatments include:

- Cycle monitoring
- Timed intercourse cycles
- Intrauterine Insemination (IUI)
- In Vitro Fertilization (IVF)
- Sperm Aspiration (TESA/PESA)

In Vitro Fertilization (IVF)

When IVF is required to maximize the chance of conception, our team of physicians and embryologists is highly experienced in providing this advanced approach to fertility treatment. We use innovative, evidence-based reproductive technologies to increase your chances of a healthy pregnancy – including solutions that support sperm recovery, motility and fertilization potential.

Funded Treatments

ReproMed Fertility provides government-funded fertility services to Ontarians, with approval from the Ministry of Health and Long-Term Care. Access is available to eligible patients for all forms of infertility, including medical and non-medical infertility, and for single people or same-sex family groups.

Visit Us

We are located in West Toronto on the northeast corner of Bloor and Islington, across the street from the Islington subway station, with easy access from the main highways. We are close to downtown Toronto, as well as Lester B. Pearson International Airport. Complimentary parking is available by turning down Lomond Drive (off Aberfoyle Crescent) and accessing the lot at the end on the left.

ReproMed

FERTILITY

Formerly operating as the Toronto Institute for Reproductive Medicine

The ReproMed Difference

Experience, insight and determination, with every aspect of your care

ReproMed Fertility is a recognized leader in achieving successful pregnancies across a full spectrum of complex fertility journeys. Our team does its utmost to customize the best treatment options to your unique fertility needs. When you come to us, you can expect highly personalized care, with honest facts and compassionate encouragement every step of the way.

A long-standing track record of treatment success

We're considered distinguished in the fertility field. Since 1990, we've been applying our deep reserves of knowledge and proven, innovative treatments to realize success rates that place us among top tier fertility clinics.

A reputation for insightful problem-solving

Sometimes simple interventions make the difference. Other times more advanced assisted reproductive technologies are needed. We persevere on the most complex fertility challenges to uncover your best path to a successful pregnancy.

Recognized leader in third-party reproduction care

Collaborating with third-party agencies and legal professionals, we ensure the medical care required for intended parents, gestational carriers and/or donors is compassionate and well-coordinated, earning our team respect across the fertility services community.

We offer a range of assessments and services throughout your fertility journey

Fertility Assessments

We start with fertility assessments to gain a clear understanding of your fertility health to tailor a treatment plan that is right for you. These assessments may include:

For Females and Males:

- A physical exam, endocrine testing, and blood work

For Females

- Ultrasound for ovarian assessment
- PAP test and gynecological assessment
- Hysterosalpingogram (HSG)

For Males

- Semen analysis
- Advanced sperm testing (DNA Fragmentation)

Fertility Preservation

Individuals may choose to freeze their eggs, embryos, or sperm until they are ready to have a baby. We offer fertility preservation services for both elective and medical reasons.

Innovative Enhancements

The ReproMed team uses the latest technologies to help ensure the healthiest possible pregnancy. Many of these innovations are included in the cost of treatment while others, if recommended, may incur additional costs. Some services we may recommend include:

- Pre-implantation genetic testing (PGT-A/PGT-M) to genetically screen embryos
- Embryo assisted hatching to help the embryo implant in the uterus
- Endometrial receptivity analysis (ERA) to determine the best day to transfer an embryo
- Sperm aspiration and extraction

Fertility Wellness

Your overall physical and emotional well-being have a vital influence on your fertility health. Our wellness partners help you nurture your mind and body to give you the best chance of a healthy pregnancy. Wellness services include acupuncture, and emotional wellbeing and stress management support.
